

## Anti-Vacuolar protein sorting-associated protein 32 homolog 2, C-terminal antibody

Catalog: PHY3423A

## **Product Information**

**Description:** Rabbit polyclonal antibody

**Background:** SNF7.1 is a Component of the ESCRT-III complex, which is required for

multivesicular bodies (MVBs) formation and sorting of endosomal cargo proteins into MVBs. The ESCRT-III complex is probably involved in the

concentration of MVB cargo (By similarity).

Synonyms: SNF7.1

**Immunogen:** KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from

Arabidopsis thaliana SNF7.1 (AT4G29160).

Form: Lyophilized

**Quantity**: 150 μg

Purification: Immunogen affinity purified

**Reconstitution:** Reconstitution with 150 µl of sterile 1XPBS (PH=7.4).

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

**Stability &**Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

**Storage:** 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

**Shipping:** The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

## **Application Information**

**Recommended Dilution:** Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 24 kDa

**Predicted Reactivity:** Among species analyzed, the sequence of the synthetic peptide

used for immunization is 80-99% homologues with the sequence

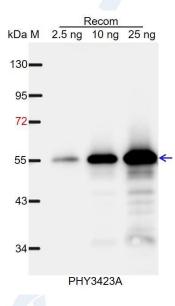

in Solanum lycopersicum, Solanum tuberosum, Gossypium

raimondii, Nicotiana tabacum, Spinacia oleracea, Cucumis sativus, Vitis vinifera.

For more species homologues information, please contact tech support at <a href="tech@phytoab.com">tech@phytoab.com</a>.

## **Application Example**

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 55 kDa.

Electrophoresis: 12% SDS-PAGE

**Transfer:** blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4°C for 1 h.

**Primary antibody:** 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L

(HRP) (Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured

with CCD camera.
