

## Anti-Photosynthetic NDH subunit of lumenal location 3, chloroplastic antibody

Catalog: PHY1006A

## **Product Information**

**Description:** Rabbit polyclonal antibody

**Background:** Chloroplast NADH dehydrogenase-like (NDH) complex mediates cyclic

electron transport around PSI and chlororespiration. Chloroplast NDH consists of five subcomplexes. In higher plants, NDH complex further associates with photosystem I (PSI) to form the NDH-PSI supercomplex. PQL1 is the PNSL3

(At3G01440) subunit of the NDH complex.

**Synonyms:** PQL1, PHOTOSYNTHETIC NDH SUBCOMPLEX L 3, PNSL3, PQL2,

PSBQ-LIKE 1, PSBQ-LIKE 2

**Immunogen:** KLH-conjugated synthetic peptide (14 aa from Central section) derived from

Arabidopsis thaliana PQL1 (AT3G01440).

Form: Lyophilized

**Quantity:** 150 μg

Purification: Immunogen affinity purified

**Reconstitution:** Reconstitution with 150 µl of sterile 1XPBS (PH=7.4).

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

**Stability &**Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

**Storage:** 12 months from date of receipt, -20 to  $-70^{\circ}$ C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

**Shipping:** The product is shipped at  $4^{\circ}$ . Upon receipt, store it immediately at the

temperature recommended above.

## **Application Information**

**Recommended Dilution:** Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

**Expected / apparent MW:** 25 kDa

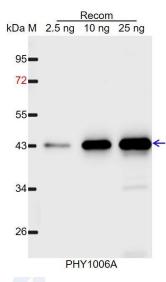

**Predicted Reactivity:** 

Among species analyzed, the sequence of the synthetic peptide used for immunization is 80-99% homologues with the sequence in *Brassica rapa, Brassica napus*.

For more species homologues information, please contact tech support at tech@phytoab.com.

## **Application Example**

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 43 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or  $4^{\circ}$ C for 1 h.

**Primary antibody:** 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L

(HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured

with CCD camera.
