

Anti-Cullin-4 antibody

Catalog: PHY3834S

Product Information

Description: Rabbit polyclonal antibody

Background: Arabidopsis CULLIN4 (CUL4) forms an E3 ubiquitin ligase with the CDD

complex and a common catalytic subunit RBX1 in mediating light control of development. CUL4 exhibits a synergistic genetic interaction with COP10 and

DET1.

Synonyms: CUL4, ATCUL4, CULLIN4

Immunogen: KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from

Arabidopsis thaliana CUL4 (AT5G46210).

Form: Lyophilized

Quantity:150 μgPurification:Serum

Peptide affinity form antibody available upon request at info@phytoab.com.

Reconstitution: Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70° C as supplied.

6 months, -20 to -70 °C under sterile conditions after reconstitution.

1 month, 2 to 8℃ under sterile conditions after reconstitution.

Shipping: The product is shipped at 4° C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 91 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

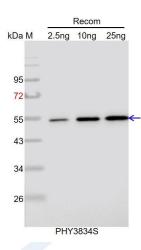

for immunization is 80-99% homologues with the sequence in Brassica rapa, Zea mays, Sorghum bicolor, Panicum virgatum,

Cucumis sativus, Setaria viridis, Solanum lycopersicum, Nicotiana tabacum, Solanum tuberosum, Brassica napus, Gossypium raimondii, Glycine max, Oryza sativa, Medicago truncatula.

For more species homologues information, please contact tech support at tech@phytoab.com.

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide

for immunization and having a molecular mass of 53 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4° C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP)

(Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured with

CCD camera.
