

Anti-Cotton leaf crumple virus (CLCrV) Capsid protein-AV1, N-terminal antibody

Catalog: NAV1015-003S Quantity: 200 µL

Immunogen Information:

Background Cotton leaf crumple virus (CLCrV) Immunogen KLH-conjugated synthetic peptide (18 aa from N terminal section) derived from Cotton leaf crumple virus CLCrV Capsid protein-AV1 (Uniprot: Q80A45 NCBI: NP_795337). We also have antibodies for different epitopes from the Capsid protein. Please request at info@nanodiaincs.com or https://www.nanodiaincs.com.

Basic Information:

Purification: SerumPeptide affinity form antibody available upon request at info@nanodiaincs.com.Clonality: PolyclonalExpected MW: 29 kDaHost: Rabbit

Product Information:

Form: Lyophilized

Reconstitution

Reconstitution with 200 μ L of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".

Stability & Storage

Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

12 months from date of receipt, -20 to -70 $^\circ\!\mathrm{C}$ as supplied.

6 months, -20 to -70 $^\circ\mathrm{C}$ under sterile conditions after reconstitution.

1 month, 2 to $8\,^\circ\!\!\mathbb{C}$ under sterile conditions after reconstitution.

Shipping

The product is shipped at 4° C. Upon receipt, store it immediately at the temperature recommended above.

Applications Information:

 Recommended Dilution:
 WB (1:1000-1:2000)

 Predicted Reactivity:
 Among species analyzed, the sequence of the synthetic peptide used for immunization is 100% homologues with the sequence in Verbena mottle virus.

 For more species homologues information, please contact tech support at info@nanodiaincs.com.

Research Use Only

Nano Diagnostics, LLc.

Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 50 kDa. **Electrophoresis:** 12% SDS-PAGE **Transfer:** blotting to NC (nitrocellulose) membrane for 1 h. **Blocking:** 5% skim milk at RT or 4°C for 1 h. **Primary antibody:** 1:1000 dilution overnight at 4°C. **Secondary antibody:** 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000). **Detection:** using chemiluminescence substrate and image were
