

# Anti-Centromeric histone 3, N-terminal antibody

Catalog: PHY6558A

#### **Product Information**

**Description:** Rabbit polyclonal antibody

Background: CENH3
Synonyms: CENH3

**Immunogen:** KLH-conjugated synthetic peptide (15 aa from N terminal section) derived from

Triticum aestivum CENH3 (TraesCS1A03G0761600, TraesCS1B03G0870200

and TraesCS1D03G0729200 / TraesCS1D02G306100).

Form: Lyophilized

**Quantity**: 150 μg

Purification: Immunogen affinity purified

**Reconstitution:** Reconstitution with 150 µl of sterile 1XPBS (PH=7.4).

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

**Stability &**Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

**Storage:** 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8℃ under sterile conditions after reconstitution.

**Shipping:** The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

## **Application Information**

Recommended Dilution: Western Blot (1:1000-1:2000), ChIP-Seq

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 18 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

for immunization is 80-99% homologues with the sequence in

Hordeum vulgare, Oryza sativa, Panicum virgatum.

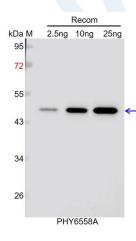

For more species homologues information, please contact tech

support at tech@phytoab.com.

### **Application Example**

#### Example1

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 47 kDa.

Electrophoresis: 12% SDS-PAGE

**Transfer:** blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or 4°C for 1 h.

**Primary antibody:** 1:1000 dilution overnight at 4°C.

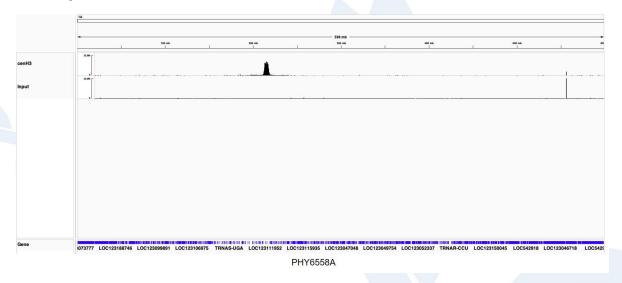

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP)

(Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured with

CCD camera.

#### Example2

Anti-CENH3 Antibody tested by Chip-seq. Chromatin was prepared from *Triticum aestivum*. 1.5 g of the wheat seedlings were fixed in 1% formaldehyde for 20 minutes, followed by the addition of 100 mmol/L glycine to terminate the fixation reaction. Rabbit IgG was used as the negative control (Input). The supernatant was incubated with 7  $\mu$ I of a CENH3 antibody. Immunocomplexes were captured for two hours at 4 °C.
