

Anti-Transcription initiation factor IIB-1 antibody

Catalog: PHY7827A

Product Information

Description: Rabbit polyclonal antibody

Background: TFIIB1 is a transcription factor that plays important roles in pollen tube growth,

guidance, and reception as well as endosperm development and is partially

functionally different from AtTFIIB2 and AtTFIIB3/AtpBRP2.

Synonyms: TFIIB1, ATTFIIB1, TFIIB, TRANSCRIPTION FACTOR IIB, TRANSCRIPTION

FACTOR IIB 1

Immunogen: KLH-conjugated synthetic peptide (16 aa from N terminal section) derived from

Arabidopsis thaliana TFIIB1 (AT2G41630).

Form: Lyophilized

Quantity: 150 μg

Purification: Immunogen Affinity Purified

Reconstitution: Reconstitution with 150 μ l of sterile 1 \times PBS (PH=7.4).

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70° C as supplied.

6 months, -20 to -70 °C under sterile conditions after reconstitution.

1 month, 2 to 8℃ under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 34 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

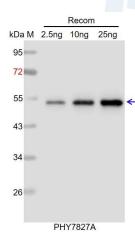

for immunization is 100% homologues with the sequence in *Brassica* rapa, *Brassica napus*, and 80-99% homologues with the sequence in

Glycine max, Nicotiana tabacum, Populus trichocarpa, Oryza sativa.

For more species homologues information, please contact tech support at tech@phytoab.com.

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 54 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4℃ for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP)

(Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured

with CCD camera.
