

Anti-ADP-ribosylation factor GTPase-activating protein AGD1 antibody

Catalog: PHY1500S

Product Information

Description:	Rabbit polyclonal antibody
Background:	AGD1 is a member of ARF GAP domain (AGD) which have 15 members in Arabidopsis, grouped into four classes. AGD1 belongs to the class 1, together with AGD2 (AT1G60860), AGD3 (AT5G13300) and AGD4 (AT1G10870). It is the regulator of membrane trafficking. And it is required for maintaining a straight growth of root hairs.
Synonyms:	AGD1, ARF-GAP DOMAIN 1
Immunogen:	KLH-conjugated synthetic peptide of AGD1 derived from <i>Arabidopsis thaliana</i> AT5G61980.
Form:	Lyophilized
Quantity:	150 µg
Purification:	Serum Peptide affinity form antibody available upon request at info@phytoab.com .
Reconstitution:	Reconstitution with 150 µl of sterile water. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".
Stability & Storage:	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 6 months, -20 to -70°C under sterile conditions after reconstitution. 1 month, 2 to 8°C under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4°C. Upon receipt, store it immediately at the temperature recommended above.

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000) Note: Optimal dilutions/concentrations should be determined by the end user.
Expected/apparent MW:	94 kDa

Research Use Only

Confirmed Reactivity:

Coming soon

Predicted Reactivity:

Among 25 analyzed species, the sequence of the synthetic peptide used for immunization is 80-99% homologous with the sequence in *Brassica napus*.

For more species homologous information, please contact tech support at tech@phytoab.com.
