

## Anti-Aldo-keto reductase family 4 member C8 antibody

Catalog: PHY3963S

## **Product Information**

**Description:** Rabbit polyclonal antibody

**Background:** AKR4C8 is an NADPH-dependent aldo-keto reductase that can act on a wide

variety of substrates in vitro including aliphatic and aromatic aldehydes and

steroids.

Synonyms: AKR4C8, ALDO-KETO REDUCTASE FAMILY 4 MEMBER C8

**Immunogen:** KLH-conjugated synthetic peptide (14 aa from N terminal section) derived from

Arabidopsis thaliana AKR4C8 (AT2G37760).

Form: Lyophilized

Quantity:150 μgPurification:Serum

Peptide affinity form antibody available upon request at info@phytoab.com.

**Reconstitution:** Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

**Stability &**Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

**Storage:** 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70 °C under sterile conditions after reconstitution.

1 month, 2 to 8<sup>°</sup>C under sterile conditions after reconstitution.

**Shipping:** The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

## **Application Information**

**Recommended Dilution:** Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 35 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

for immunization is 100% homologues with the sequence in Solanum

lycopersicum, and 80-99% homologues with the sequence in

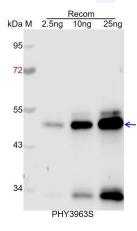

Brassica napus, Brassica rapa, Glycine max, Gossypium raimondii,

Medicago truncatula.

For more species homologues information, please contact tech support at <a href="mailto:tech@phytoab.com">tech@phytoab.com</a>.

## **Application Example**

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide

for immunization and having a molecular mass of 52 kDa.

Electrophoresis: 12% SDS-PAGE

**Transfer:** blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or 4℃ for 1 h.

**Primary antibody:** 1:1000 dilution overnight at 4℃.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP)

(Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured with

CCD camera.
