

Anti-ATP-dependent Clp protease proteolytic subunit 6, chloroplastic, C-terminal antibody

Catalog: PHY3846S

Product Information

Description: Rabbit polyclonal antibody

Background: CLPP6 is one of several nuclear-encoded ClpPs (caseinolytic protease). It

cleaves peptides in various proteins in a process that requires ATP hydrolysis, and has a chymotrypsin-like activity. It plays a major role in the degradation of

misfolded proteins.

Synonyms: CLPP6, CLP PROTEASE PROTEOLYTIC SUBUNIT 6, NCLPP1, NCLPP6,

NUCLEAR-ENCODED CLPP 1

Immunogen: KLH-conjugated synthetic peptide (16 aa from C terminal section) derived from

Arabidopsis thaliana CLPP6 (AT1G11750).

Form: Lyophilized

Quantity: 150 μg **Purification:** Serum

Peptide affinity form antibody available upon request at info@phytoab.com.

Reconstitution: Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70 °C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

Shipping: The product is shipped at 4° C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 31 kDa

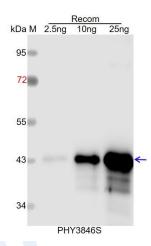

Predicted Reactivity:

Among species analyzed, the sequence of the synthetic peptide used for immunization is 100% homologues with the sequence in *Gossypium raimondii*, *Glycine max*, *Populus trichocarpa*, and 80-99% homologues with the sequence in *Spinacia oleracea*, *Nicotiana tabacum*, *Brassica napus*, *Vitis vinifera*, *Brassica rapa*, *Medicago truncatula*.

For more species homologues information, please contact tech support at tech@phytoab.com.

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 44 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4° C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4℃.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L

(HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured

with CCD camera.
