

Anti-Protein TIC 22, chloroplastic, C-terminal antibody

Catalog: PHY2140S

Product Information

Description:	Rabbit polyclonal antibody	
Background:	In Arabidopsis, Tic22 has two homologues, atTic22-III (AT3G23710) and	
	atTic22-IV(AT4G33350). The two Tic22 isoforms act redundantly in chloroplast	
	protein import, and that their function is non-essential but nonetheless required	
	for normal chloroplast biogenesis, particularly during early plant development.	
Synonyms:	TIC22-IV, ATTIC22-IV, TRANSLOCON AT THE INNER ENVELOPE	
	MEMBRANE OF CHLOROPLASTS 22-IV	
Immunogen:	KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from	
	Arabidopsis thaliana TIC22-IV (AT4G33350).	
Form:	Lyophilized	
Quantity:	150 µg	
Purification:	Serum	
	Peptide affinity form antibody available upon request at <u>info@phytoab.com</u> .	
Reconstitution:	Reconstitution with 150 µl of sterile water.	
	"Note: please spin tube briefly prior to opening it to avoid any losses that might	
	occur from lyophilized material adhering to the cap or sides of the tube".	
Stability &	Use a manual defrost freezer and avoid repeated freeze-thaw cycles.	
Storage:	12 months from date of receipt, -20 to -70°C as supplied.	
	6 months, -20 to -70°C under sterile conditions after reconstitution.	
	1 month, 2 to 8°C under sterile conditions after reconstitution.	
Shipping:	The product is shipped at 4°C. Upon receipt, store it immediately at the	
	temperature recommended above.	

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000)
	Note: Optimal dilutions/concentrations should be determined by the
	end user.
Expected / apparent MW:	30 / 16 kDa
Confirmed Reactivity:	Arabidopsis thaliana

PhytoAB Inc.

Research Use Only

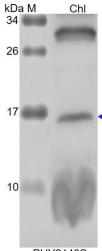

Predicted Reactivity:

Among species analyzed, the sequence of the synthetic peptide used for immunization is 80-99% homologues with the sequence in Brassica napus, Brassica rapa.

For more species homologues information, please contact tech support at tech@phytoab.com.

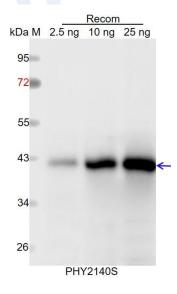

Application Example Example1:

Chl: 10 µl total chloroplast protein from Arabidopsis thaliana. Electrophoresis: 15% SDS-PAGE Transfer: blotting to NC (nitrocellulose) membrane for 1 h. Blocking: 5% skim milk at RT or 4°C for 1 h. Primary antibody: 1:1000 dilution overnight at 4°C. Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000). **Detection:** using chemiluminescence substrate and image were captured with CCD camera.

PHY2140S

Example2:

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 42 kDa. Electrophoresis: 12% SDS-PAGE Transfer: blotting to NC (nitrocellulose) membrane for 1 h. **Blocking:** 5% skim milk at RT or 4° C for 1 h. Primary antibody: 1:1000 dilution overnight at 4°C. Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000). Detection: using chemiluminescence substrate and image were captured with CCD camera.
