

Anti-Photosystem II protein D1 2, N-terminal antibody

Catalog: PHY5246S

Product Information

Description:	Rabbit polyclonal antibody	
Background:	Photosystem II (PSII) is a light-driven water:plastoquinone oxidoreductase that	
	uses light energy to abstract electrons from H2O, generating O2 and a proton	
	gradient subsequently used for ATP formation. It consists of a core antenna	
	complex that captures photons, and an electron transfer chain that converts	
	photonic excitation into a charge separation.	
Synonyms:	PsbA2	
Immunogen:	KLH-conjugated synthetic peptide (14 aa from N terminal section) derived from	
	Synechocystis sp. PCC 6803 PsbA2 (slr1311).	
Form:	Lyophilized	
Quantity:	150 µg	
Purification:	Serum	
	Peptide affinity form antibody available upon request at <u>info@phytoab.com</u> .	
Reconstitution:	Reconstitution with 150 μl of sterile water.	
	"Note: please spin tube briefly prior to opening it to avoid any losses that might	
	occur from lyophilized material adhering to the cap or sides of the tube".	
Stability &	Use a manual defrost freezer and avoid repeated freeze-thaw cycles.	
Storage:	12 months from date of receipt, -20 to -70 $^\circ C$ as supplied.	
	6 months, -20 to -70 $^\circ C$ under sterile conditions after reconstitution.	
	1 month, 2 to 8 $^\circ C$ under sterile conditions after reconstitution.	
Shipping:	The product is shipped at 4 $^\circ\!\mathrm{C}$. Upon receipt, store it immediately at the	
	temperature recommended above.	

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000)
	Note: Optimal dilutions/concentrations should be determined by the
	end user.
Expected / apparent MW:	40 kDa
Predicted Reactivity:	Among species analyzed, the sequence of the synthetic peptide used

for immunization is 80-99% homologues with the sequence in *Synechococcus elongatus* PCC 7942. For homologues with other species especially algae, please contact

tech support at tech@phytoab.com.

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 43 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4° C for 1 h.

← **Primary antibody:** 1:1000 dilution overnight at 4 °C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured with CCD camera.

Research Use Only
