

# Anti-Protochlorophyllide-dependent translocon component 52, chloroplastic antibody

Catalog: PHY1370A

## **Product Information**

Description:	Rabbit polyclonal antibody
Background:	PTC52 is similar to ACD1. And it localizes in plastids. It involved in
	oxidation-reduction process and protein transport. Two Tic55 homologs have
	been proposed to exist in Arabidopsis: atTic55-II (AT2G24820) and AtPTC52
	(AT4G25650) (Protochlorophyllide-dependent Translocon Component, 52 kDa;
	has also been called atTic55-IV).
Synonyms:	PTC52, ACD1-LIKE, PROTOCHLOROPHYLLIDE-DEPENDENT
	TRANSLOCON COMPONENT, 52 KDA, TIC55-IV, TRANSLOCON AT THE
	INNER ENVELOPE MEMBRANE OF CHLOROPLASTS, 55 KDA-IV
Immunogen:	KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from
	Arabidopsis thaliana PTC52 (AT4G25650).
Form:	Lyophilized
Quantity:	150 µg
Purification:	Immunogen affinity purified
Reconstitution:	Reconstitution with 150 $\mu$ l of 0.01 M sterile PBS.
	"Note: please spin tube briefly prior to opening it to avoid any losses that might
	occur from lyophilized material adhering to the cap or sides of the tube".
Stability &	Use a manual defrost freezer and avoid repeated freeze-thaw cycles.
Storage:	12 months from date of receipt, -20 to -70 $^\circ \mathbb C$ as supplied.
	6 months, -20 to -70 $^\circ\!\!\!\!\!^\circ$ under sterile conditions after reconstitution.
	1 month, 2 to $8^{\circ}$ C under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4 $^\circ\!\mathrm{C}.$ Upon receipt, store it immediately at the
	temperature recommended above.

## **Application Information**

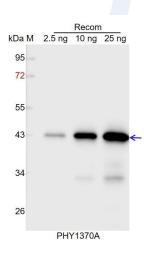

<b>Recommended Dilution:</b>	Western Blot (1:1000-1:2000)
	Note: Optimal dilutions/concentrations should be determined by the
	end user.
Expected / apparent MW:	64 kDa

#### Predicted Reactivity:

For more species homologues information, please contact tech support at <u>tech@phytoab.com</u>.

#### **Application Example**

Recom: 2.5 ng, 15 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 43 kDa.
Electrophoresis: 12% SDS-PAGE
Transfer: blotting to NC (nitrocellulose) membrane for 1 h.
Blocking: 5% skim milk at RT or 4°C for 1 h.
Primary antibody: 1:1000 dilution overnight at 4°C.
Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured with CCD camera.

**Research Use Only**
