

## Anti-MADS-box protein FLOWERING LOCUS C, C-terminal antibody

Catalog: PHY7576S

## **Product Information**

Description:	Rabbit polyclonal antibody
Background:	FLC is a MADS-box transcription factor and acts as a floral repressor. It seems
	to play a central role in the regulation of flowering time in the late-flowering
	phenotype by interacting with 'FRIGIDA'. And it inhibits flowering by repressing
	'SUPPRESSOR OF OVEREXPRESSION OF CONSTANS 1'.
Synonyms:	FLC, AGAMOUS-LIKE 25, AGL25, FLF, FLOWERING LOCUS C,
Immunogen:	FLOWERING LOCUS F, REDUCED STEM BRANCHING 6, RSB6 KLH-conjugated synthetic peptide (17 aa from C terminal section) derived from <i>Arabidopsis thaliana</i> FLC (AT5G10140).
Form:	Lyophilized
Quantity:	150 μg
Purification:	Serum
	Peptide affinity form antibody available upon request at <u>info@phytoab.com</u> .
Reconstitution:	Peptide affinity form antibody available upon request at <u>info@phytoab.com</u> . Reconstitution with 150 µl of sterile water.
Reconstitution:	
Reconstitution:	Reconstitution with 150 µl of sterile water.
Reconstitution: Stability &	Reconstitution with 150 µl of sterile water. "Note: please spin tube briefly prior to opening it to avoid any losses that might
	Reconstitution with 150 µl of sterile water. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".
Stability &	Reconstitution with 150 µl of sterile water. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube". Use a manual defrost freezer and avoid repeated freeze-thaw cycles.
Stability &	Reconstitution with 150 µl of sterile water. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube". Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied.
Stability &	<ul> <li>Reconstitution with 150 µl of sterile water.</li> <li>"Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".</li> <li>Use a manual defrost freezer and avoid repeated freeze-thaw cycles.</li> <li>12 months from date of receipt, -20 to -70°C as supplied.</li> <li>6 months, -20 to -70°C under sterile conditions after reconstitution.</li> </ul>

## **Application Information**

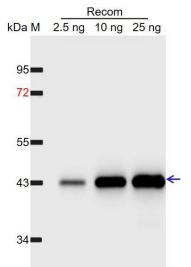

<b>Recommended Dilution:</b>	Western Blot (1:1000-1:2000)
	Note: Optimal dilutions/concentrations should be determined by the
	end user.
Expected / apparent MW:	22 kDa
Predicted Reactivity:	Among species analyzed, the sequence of the synthetic peptide used

for immunization is 80-99% homologues with the sequence in *Brassica napus*, *Brassica rapa*.

For more species homologues information, please contact tech support at <u>tech@phytoab.com</u>.

## **Application Example**

PHY7576S

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 43 kDa.
Electrophoresis: 12% SDS-PAGE
Transfer: blotting to NC (nitrocellulose) membrane for 1 h.
Blocking: 5% skim milk at RT or 4°C for 1 h.
Primary antibody: 1:1000 dilution overnight at 4°C.
Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG

H&L (HRP) (Cat# PHY6000). **Detection:** using chemiluminescence substrate and image were captured with CCD camera.

Research Use Only
